To whom it may concern:

I am writing this letter of recommendation on behalf of Craig Goldberg. In 2012 Craig was recommended to me by my architect John Grable as the best audio/video company in San Antonio. I was in the middle of a major remodel of my lake house on Lake McQueeney and Craig along with his staff at Wired performed all the wiring and installation of all the speakers for sound all over the house and down to the deck. They performed the same for the installation of all of my TVs including installing a home theater. Craig's attention to detail is second to none. He wore booties every time he entered the house even while it was under construction and always detail cleaned any area where he worked.

Since that time, I've had the opportunity to work with Craig and his team on two other occasions. I bought a house in Alamo Heights and took it back to the stud over the course of 12 months and Craig again wired the entire house for sound along with running cat6 cable all over the house to insure great internet and installed all the TVs and sound system. Once again, Craig did a fantastic job. As a side note, when I sold the house, the buyers also exclusively used Craig on their many houses and insisted that Craig be the one to de-install any equipment that I would be taking.

Finally, over the course of the last two years I built a house and guest house that was recently featured on the AIA homes tour and Craig was again responsible for the creation and installation of a large home theater and the wiring of both houses including all TVs, speakers and internet connections. Craig does outstanding work and stands behind all the work he performs. If I ever have questions, a problem or need help, Craig is always a phone call away and will answer any time, day or night including weekends. I highly recommend Craig.
