Re: Wired Home Theater System – Craig Goldberg

Wired installed an Audio-Visual system at my residence in Woodway Lane which was custom built between March 2017 to July 2018.

They completed the installation and programming of the full system as per their bid including the installation of a motorized lift in a cabinet for hiding the TV. Their craftsmanship was above my expectations and their work was very detailed, clean and seamless. Over the last 18 months, the A/V system installed and their programming has worked without any glitches but I also know that the staff (Craig and Tom) are one phone call away and very responsive on support in case they are needed.

The value proposition for Wired (quality, craftsmanship and cost) is beyond what any of their competitors can deliver and I highly recommend their services.
